

Small Vapor Phase Dewar

Scope of Application

Dual-mode LN₂ storage (vapor/liquid phase), provide real-time monitoring of temperature and liquid level. Configured with LN₂ auto-refill and remote alarm function to secure long-term preservation of embryos, vaccines, and reagents at research institutes, IVF centers, and CDC biobanks.

■ Key Features

Vapor and Liquid Phase Storage

Compatible with both gas and liquid phase storage modes, which can be flexibly selected according to needs.

Reliable Temperature Uniformity and Stability

Maintains below -180°C even on the top layer, ensuring uniform vapor phase storage; Internal temperature remains stable (below -150°C) even 48 hours after opening the lid.

Data Storage Up to 10 Years

Temperature records can be download via USB and RS485.

Lightweight and Portable

Made of aviation aluminium, has excellent portability and durability.
